

Airl radio stations are being threatened by the potential for LPFM domination of the air waves. I would like to ask as a listener of airl that the airl fm stations not be affected by this change or that the change does not occur. Airl offers me positive music that I can not get on other stations. It is good for us as a community to have this kind of uplifting music available to our youth and young adults. I know that I as well as many other listeners would be very disappointed if Airl radio service was to be compromised.
